32 responses

People focus on quality-of-life and/or systems change outcomes.

32 responses

Please share any other thoughts and comments regarding the status of PBS:

16 responses

Many practitioners are talking about positive supports and then do traditional not PBS interventions and services.

There have been situations where BCBA folks & others continue to rely too much on consequence based plans without proactive strategies and without taking into account quality of life and systems change outcomes that have great impact (esp. with adults who display behavioral issues).

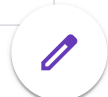

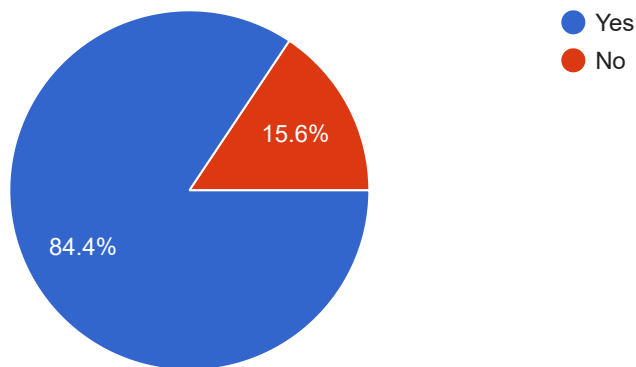

I would love to see more research based positive psychology strategies integrated, for example having a gratitude exercises as part of the PBSP. In WV, we are providing more PBS services in children's mental health which has been very receptive and effective. :)

PBS is growing in Australia under the National Disability Insurance Scheme but there is a shortage of skilled practitioners and limited national practice leadership. PBS is generally considered the best option but there are critics who share concerns about PBS links to ABA (early intervention) in Autism. APBS Australia is growing and covers schools & family & Community

PBS Information and Training Provided

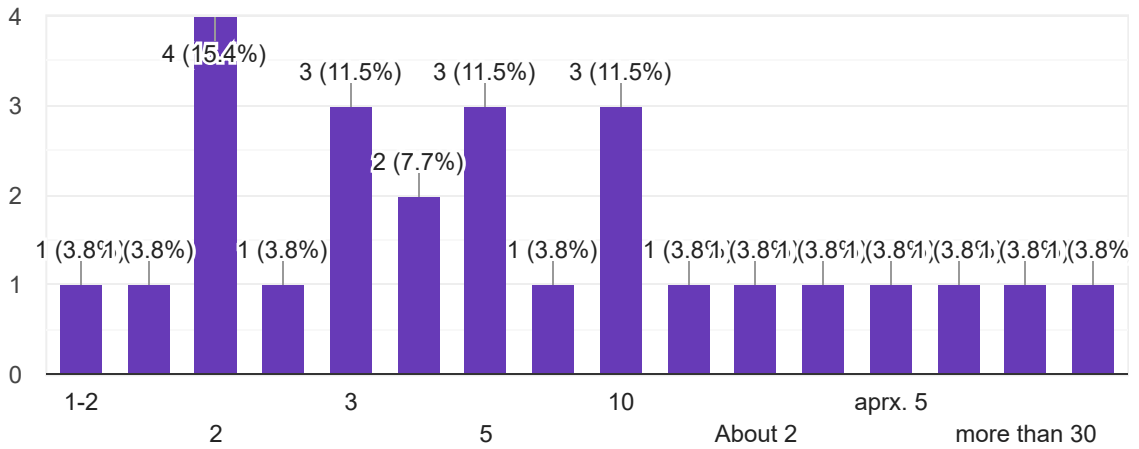

Did you attend any presentations, workshops, webinars, or other training events related to positive behavior support (PBS) this year?

32 responses

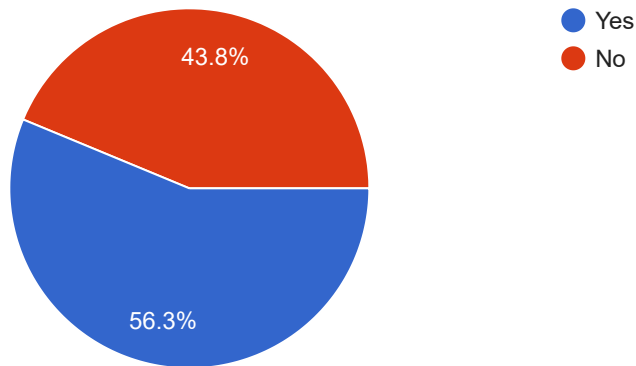

If yes, approximately how many presentations, workshops, webinars, or other training events did you attend?

26 responses

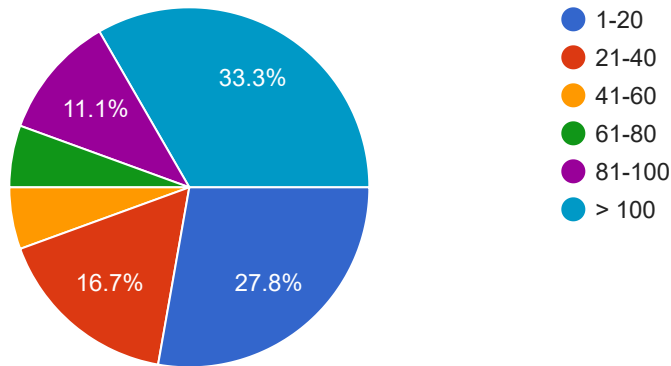

Did you deliver any presentations, workshops, webinars, or other training events related to PBS this year?

32 responses

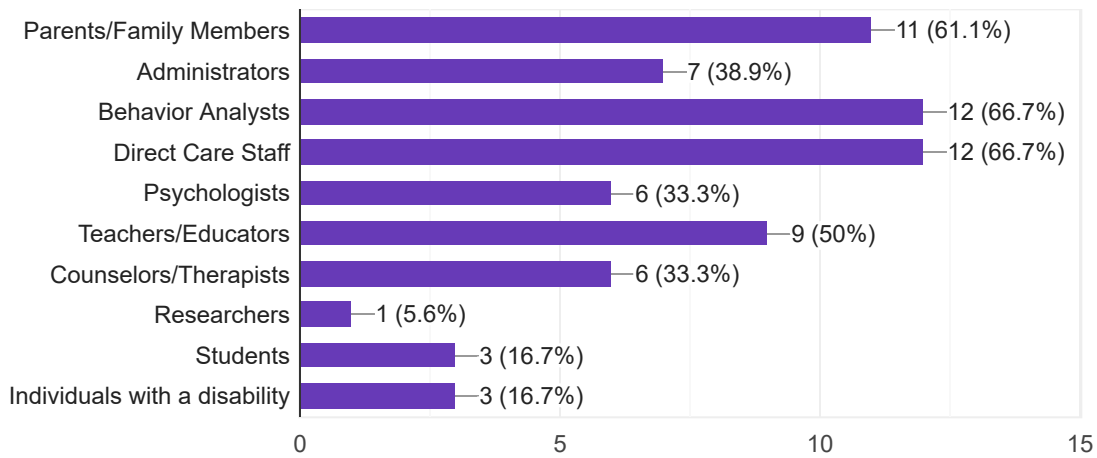

If yes, approximately how many people participated in the event(s) total?

18 responses

Please describe the audience(s) for your presentation(s). Check all that apply.

18 responses

Please list the general topics of the events you delivered.

17 responses

PBS in homes, school and community

Using Person-centered services & PBS to support adults safely & responsibly to continue and/or re-engage in their essential routines (Competitive Integrated Employment, volunteerism, etc.)

ASERT in PA

What could HCPBS provide to support you more effectively in your efforts to enhance and expand PBS?

9 responses

How about positive interventions in family violence

More discussions/research on life after age 18 (PBS/PBIS across the lifespan)

A toolbox with quick and easy forms for families to use; Examples of PBSPs based on case studies (which I know we would want to put everything and the kitchen sink to explain how to come to person-centered interventions so it may be easier said than done).

A webinar that presents data on delivering PBS services remotely (phone, computer). Are outcomes for people's lives still being met when services are delivered in a distance format?

Practice Videos, resources or 'conversation starters'

Team building activities

Interactive web communication

Please provide any additional comments and suggestions.

6 responses

None

Love the HCPBS webinars and resources!

N/A

Thank you for doing this important research and work!

Thanks to all HCPBS leaders for your time, effort, and energy

I just joined the HCPBS family a few months ago. I haven't had the opportunity to fully participate in any activities.
